Presentation

As we are coming to an end to the 2011-12 Chilean fresh fruit season, one can't help but look back at the challenges and opportunities it has left behind. The season did not proceed without leaving high hurdles for our industry to surpass throughout the year.

A severe frost in the Atacama Region slowed the start of the early table grape harvest of the 2011-12 season, but the industry quickly recovered and we are now coming close to reaching a similar volume level compared to last year. Labor and water shortages have created even larger challenges but the most difficult obstacle we face ourselves with every season, is caused by the continuing decline of the dollar against the Chilean peso.

We saw modest declines in shipments to some of our mature markets because of aggressive bidding for our fruit from emerging markets. Shipments to North America have modestly declined and due to the crisis affecting Central Europe, we've seen a larger drop in this market. These declines were more than offset by growth in the Far East and Latin America, while the Middle East has remained fairly stable.

However, we remain cautiously optimistic and believe this will undoubtedly be a season for consolidating existing relationships with key suppliers and customers, and taking a conservative approach to market opportunities that may present themselves.

This past season we unveiled the results of a branding program that has been designed to unify the personality of all of our products. The individual fruit category logos are now being integrated into all of our communication programs. This branding program, which has been developed with the support of the government's promotion bureau ProChile, will aim to increase our country's competitiveness in our destination markets.

The newly formed product specific committees continue to build momentum. Following the successful formation of the Chilean Blueberry and the Chilean Avocado Committee, we now have specific Chilean Kiwi, Citrus, and Cherry committees. They have been joined by the Chilean Prunes Association and the Chilean Walnut Commission and all coexist under the umbrella and auspices of the new Chilean fresh fruit industry international brand.

All of the activities recapped above are designed to support the fact that we continue to position ourselves as a reliable fresh fruit supplier to the world.

La pasión por la fruta

Suministro directo y eficiente del productor al comercio minorista en Europa

Global Fruit Point (GFP)

se concentra en la importación de fruta convencional y orgánica, principalmente del hemisferio sur. Para nosotros es importante la cooperación directa y transparente.

Uvas de mesa, manzanas, peras, fruta de carozo, melones, piñas, cítricos, paltas y berries son nuestros principales productos de importación.

Gracias a las estructuras logísticas en Rotterdam y Hamburgo, podemos garantizar el manejo sencillo y rápido de la fruta en Europa. Nuestro propio equipo de control de calidad en los puertos y los análisis de laboratorio rápidos y detallados nos permiten monitorear todos los sistemas de seguridad alimentaria.

Gracias a las estructuras logísticas en Rotterdam y Hamburgo, podemos garantizar el manejo sencillo y rápido de la fruta en Europa.
